

A black and white fashion illustration of a woman in profile, facing left. She is wearing a long-sleeved, form-fitting dress with horizontal stripes. The dress has a high, ruffled collar and a full skirt with a ruffled hem. She is also wearing a large, ornate hat with a veil and a decorative flower. The illustration is signed 'H. H. H. H.' in the bottom left corner.

WERE LEFT TO PERISH

Cruelty of Abductors of Tampa Cigar Makers.

WERE SEVEN DAYS AT SEA.

Set Down Off Honduran Coast With Handful of Provisions, the Labor Leaders' Case Seemed Hopeless, Saved by Friendly Savage.

Key West, Fla., Sept. 5.—Like a romance of the old days, when pirates and slavers sailed the Spanish main, was the story told here by the thirteen abducted leaders of the striking cigar makers of Tampa, Fla., on their return from exile. The men, who composed the central committee of the Houdurista union of Tampa, arrived here on a small fish schooner, the Gertrude, of this port. Marooned on a barren, uninhabited isle off the coast of Honduras, they had by an unexpected turn of fortune escaped death from exposure and starvation and made their way to civilization and safety. They believe it was the intention of their captors that they should never return from exile.

The authorities at Washington have instructed the United States district attorney at Jacksonville, Fla., to make an investigation of the matter. Sworn depositions of the men taken before federal officials have been mailed to Washington.

All Marked by Sufferings.

The party consisted of six Spaniards, six Cubans and one Englishman. The Cubans and the Englishman, however, are naturalized American citizens. The stories they tell are substantially the same, differing only in minor details.

Luis Barcia, who was taken at midnight from the bedside of his wife, whose accompaniment had taken place three days before and whose death has since been reported as a result of the shock incident to her husband's sudden disappearance, says he was forced into a closed carriage and taken to the railroad station, where he was put into an electric car, of which the lights were out, the current having been shut off. Eight of his comrades, who had been similarly captured, were put with himself, into the rear compartment of the car and taken to Ballast Point, a few miles west of Tampa, on Hillsborough bay. Four other members of Resistencia union had previously been taken through the woods in a wagon to the same place, where a tug with steam up awaited them.

Several of the guards on the car, the men say, were prominent citizens of Tampa and well known to them.

Voyage Across the Gulf.

After a brief conference at Ballast Point the thirteen men were dragged aboard the tug, and the start was made amid derisive farewells from the abductors on the dock. The tug headed for the schooner Marie Cooper, which was riding at anchor in the stream with all sails set. The men were transferred to the schooner under a heavy guard. This was on Tuesday night, Aug. 6.

A stiff breeze soon carried them down the bay and out to sea, and long before daylight of the morning following the light on Egmont key, at the entrance to Hillsborough bay, was lost to sight.

On the seventh day land was sighted, and the captives were informed that their destination had been reached. Near approach revealed a long, low stretch of sand beach without sign of human habitation.

Hobbed Before the Landing.

Boats were lowered and preparations made for landing. Before passing over the schooner's rail each man was subjected to a rigid search, and whatever money was found was taken away. This action, however, had been anticipated, and less than \$100 was found, the men having succeeded in evading the vigilance of the guards and concealing greater amounts.

On landing each man received 25 of the money previously taken from him. A box of soda crackers, two small hams, three cans of beef and about a gallon of water were placed on the beach. The boats then returned to the schooner, which immediately set sail and disappeared in the distance.

Left alone on the beach with their handful of provisions, the thirteen men realized for the first time their situation. They had purchased a revolver, with a few rounds of cartridges, from Captain La Penotiere of the Marie Cooper, but had no knowledge of the country and had been told they were 120 miles from Truxillo.

Saved by Friendly Indian.

For days they wandered along the beach, husbanding their meager supplies and without encountering a human being or sighting a sail. Their small stock of provisions finally gave out, the water supply was exhausted, their hands and faces were burned by the tropical sun and their feet blistered by long marches. They began to despair of ever reaching home and had almost given up the fight when they were discovered by an Indian. He brought aid, took them to the mainland and guided them to the plantation of a Mr. Bruno, where they were well received. Their immediate wants were supplied, and they procured a small boat to take them to Truxillo.

They were told by Mr. Bruno that from the description they gave of the island they had evidently been landed near the mouth of Plantation river. At Truxillo they had the good fortune to meet two Cubans, formerly residents of Florida and now engaged in fruit culture there, who supplied funds and hired a schooner to take them to Bonacore, where they were equally fortunate to find the schooner Gertrude seeking a cargo of fruit for this market. They chartered her for \$100 and sailed for Key West. Their troubles were over, for their voyage hither proved uneventful.

INFATUATION OF SULTAN.

He Is Said to Be Dominated by the Idea of Pan-Islamism.

London, Sept. 5.—A dispatch to The Times from Vienna says the French government's course in the dispute with Turkey meets with the approval of a majority of the powers and also of public opinion in Europe.

The dispatch adds that the sultan's overweening infatuation dates from the pan-Islamic agitation following the Armenian massacres five years ago. He then impressed upon his Moslem subjects that the powers were afraid to interfere. Pan-Islamism was further encouraged by the visit of Emperor William to Constantinople. The idea of a Moslem mission to China profoundly impressed Mohammedans. The sultan is said to be dominated by an absorbing idea of pan-Islamism.

Powers having Mohammedan subjects are pleased with the vigorous course France has taken. They believe that the rupture of diplomatic relations between France and Turkey will serve as a warning.

The Paris correspondent of The Times says rumors that troops have been ordered to Turkey from Toulon are not taken seriously in the capital.

The Temps in an inspired communication suggests that the fact that the sultan at first apparently yielded to the pressure exercised by France was due to the announcement that a French fleet was approaching Ottoman waters. Instead of going there the fleet returned to Toulon for the maneuvers and review, and the sultan then receded from the position he had taken.

Doom Sounded For Independence.

Boston, Sept. 5.—In spite of the strenuous efforts of Boston yachtmen and business men to prevent the destruction of the independence of the work of carrying out Mr. Lawson's avowed purpose was begun yesterday afternoon. All the light fixtures and tackle of the boat above deck were taken down and off the boat and were stored in the yard of Lawley, the builder of the would be defender. Captain Huff conducted these operations with a melancholy mien, and his voice was decidedly husky as he expressed his extreme regret at the untoward end of the yacht. Captain Huff has not yet given up all hope of ultimate salvation of the craft and declares that he will not believe that the independence is to be broken up until he has actually seen it done.

Built Funeral Pyre in Cell.

Newark, N. J., Sept. 5. With a long term in state prison staring him in the face, Frederick Ring, a negro in the county jail, made a desperate attempt to burn himself to death in his cell. He took all the straw from his mattress, piled it on the floor and, wrapping himself in his blanket, touched a match to the pyre. A "trusty" discovered the danger, and a keeper threw open the cell door and dragged Ring from his fiery bed. Ring is said to be a member of the notorious "Waverly gang" of highway robbers. He is awaiting trial on two charges of highway robbery.

Chinese in Peking Pleaded.

London, Sept. 5. A dispatch from Peking to The Times says the Chinese are chuckling over the result of the Chan affair. The misunderstanding is said to have given an opportunity to Russia which that power cleverly seized. From first to last the Russian representative in Peking advised Li Hung Chang to remain firm, asserting that the czar was intervening with Emperor William to spare China indignity. As a result of this the Chinese in the capital attribute the success of China's diplomacy to Russia's influence.

Three Killed in Landslide.

Cleveland, O., Sept. 5. Three men were killed and three others seriously injured in a landslide at the new Lake Shore bridge over the boulevard entrance to Gordon park. Seven hundred tons of earth, loosened by the flood of Sunday, suddenly slid down from the bank, burying a force of laborers engaged in work on the bridge. The comrades of those who were buried immediately began the work of rescue, but it was nearly two and a half hours before the last body was dug out.

Shot His Father-in-Law.

Philadelphia, Sept. 5. Henry Gauscht, a well known musical instrument dealer of this city, was murderously assaulted last night by his son-in-law, Jacob Psedendofer, at Chestnut Hill, a suburb of this city. The latter shot his father-in-law three times. Psedendofer claims that Gauscht took his wife from him because he was poor and would not recognize him as his son-in-law. Gauscht will probably recover.

Protest Against British Coal Tax.

London, Sept. 5.—At the meeting of the British Association of Chambers of Commerce at Newcastle a resolution was introduced protesting against the export coal tax. It admitted that the industry was flourishing, but declared that the trade should not be hampered at a time when foreign nations owing coalfields were fostering the industry to the greatest extent possible.

Attempt to Burn Chicago Theater.

Chicago, Sept. 5.—An attempt has been made to burn the Orpheum theater. There was an explosion, and the firemen found traces of powder and gasoline. The theater has been in litigation for six months. Hurrik & Seamon of New York were ousted in the winter for nonpayment of rent. Louis Houseman heads the company now in possession.

Refugee Recalls Manir Bey.

Constantinople, Sept. 5.—Manir Bey, Turkish ambassador to France, who is now in Switzerland, has been ordered to return to Constantinople.

RENEGADE CAPTURED.

Said to Have Led Filipinos Who Killed Lawton.

Manila, Sept. 5.—Lieutenant Hazzard of the Third cavalry has brought in here Arthur Howard, the American deserter, who was recently captured by the lieutenant while in command of some Macabebe scouts in the island of Mindoro. He was placed in jail and will shortly be court martialled.

Howard denies that he was ever an American soldier. He claims he was born in Spain, that his father was English and his mother Spanish, but that he espoused the cause of the Filipinos. In 1896, after peace was declared, he says he went to Hongkong and returned in 1898 as Aguinaldo's chief of artillery.

While in that position, Howard says, he made friends with many Americans before the insurrection, including General Green. He claims he cast his lot with Aguinaldo at the time of the rupture with the Americans and that he brought in sixteen American prisoners under a flag of truce at Angeles in September, 1899.

Howard denies that he commanded the force at San Mateo which killed General Lawton.

He speaks like an educated Englishman. Lieutenant Hazzard says he himself saw Howard at Angeles in 1899. Two former California volunteers yesterday identified Howard as a deserter from their regiment named Walley of Company A, who deserted in 1899.

To Retire Cuban Sugar.

New Orleans, Sept. 5.—It is made known that the Gramercy Sugar company, owning the Gramercy refinery, just above New Orleans, and which is composed almost entirely of New York capitalists, has decided not to refine the Louisiana sugar crop in future, but to bring all the raw sugar used in the refinery from Cuba. To that end it has just purchased for \$2,000,000 the Constanza plantation of 65,000 acres near Cienfuegos. The plantation produced 50,000,000 pounds of sugar just before the troubles in Cuba.

Golf Murder Suspects Discharged.

New York, Sept. 5.—At the conclusion of the coroner's inquest at Mount Vernon, N. Y., on the murder of David Scott, steward, and John Stevens, head waiter of the Sivanoy club last Saturday night, Backenham and Williams, suspects, were discharged, and Warner Simms, a waiter, was held to the grand jury. The murder is still a mystery.

Slitka Indians Lawless.

Washington, Sept. 5.—In a letter written at Slitka, Aug. 19, Governor Brady of Alaska reports to the interior department a general census and fight among the natives at Yakutat, an Indian settlement 200 miles north of Slitka, which is the headquarters for an important Swedish missionary and educational enterprise.

Sampson's Health Improved.

Washington, Sept. 5. Captain Lemley, judge advocate general of the navy and judge advocate of the Selkay court of inquiry, has received a letter from Mrs. William T. Sampson in which she said that Admiral Sampson's condition was improving and that he would make every effort to appear at the Selkay investigation.

BRIEF NEWS NOTES.

The Methodist ecumenical conference has opened in London.

The German cruiser Wacht was sunk after a collision with the battleship Sachsen.

At Granite, Okla., a gusher of oil has been struck at a depth of 330 feet. The flow is very heavy, and the discovery has created great excitement.

There were 12,298 deaths in New York state during the month of July, according to the monthly bulletin of the state health commissioner.

A disastrous fire started by a spark from a Santa Fe engine caused a property loss of \$100,000 in Emporia, Kan. Three lumber yards and a church were burned, and it is said that Chief Humphreys of the fire department perished in the flames.

Diamonds and other valuables worth \$25,000, which were recently shipped into the country by a prominent Chicago man on his return from Europe without the payment of duty, have been seized by a special agent of the treasury department in Chicago.

Steel Ayres—How do you like a new song?
Helen Blazes—It needs ventilation.
Steel Ayres—In what way?
Helen Blazes—The air is bad.

MEN AS THEY PASS.

Henry Watterson began business after the war on \$30 obtained by paying his watch.

Buffalo Bill long lived in Nebraska, but is now a resident of Wyoming, where his home town, in Big Horn county, is named Cody in his honor.

Judge Charles Carroll Goodwin has been editor of the Salt Lake Tribune for more than 20 years. As a writer and speaker he is popular and influential in his state.

Hubbard E. McDonald, the journal clerk of the United States senate, is the third of his family to hold the place, his father and grandfather preceding him in it.

Giuseppe Zanardelli, the new Italian premier, has been in public life 40 years and has been in many cabinets, but has never been premier before. He is regarded as wise, strong and patriotic.

When John Pierpont Morgan travels, he has a train of five most elegantly appointed coaches at his disposal. Instead of merely a private car, he has a whole train that is under his exclusive control.

Sir Alexander Condie Stephen, who has been for many years British minister resident at Dresden, is about to retire from the diplomatic service, and has been appointed a groom in waiting to King Edward.

Congressman Charles B. Landis, the Indiana orator, is a self made statesman. These are his own words: "I pitched lay as a lad, worked in a gravel pit in my youth and attended college only when I reached manhood."

11. Herman lives in what was the handsome courthouse of Garfield county, Kan., and it didn't cost him a cent. When the county organization was given up and the boom town burst, Herman simply homesteaded the courthouse quarter section and moved in.

President Barber of the Diamond Match company has presented to the town of Barborton, O., which he founded, a park of 200 acres, which he will lay out at a cost of \$100,000. He is planning for himself a \$250,000 residence, which is to become a hospital after his death.

THE WHIRL OF FASHION.

Pink in loveliest tints is a notably favored color this season.

Taffeta again takes its place as a favorite lining for skirts and bodices. Delicate pieces of very fine gold, pearl and opal jewelry are now worn with elegant all white evening toilets.

The tucking of fabrics of every description has become a fine art. Rows of perfectly laid tucks on a gown are one of the most economical ways of trimming it.

New French sleeveless princess dresses shaped very much like the old style polonaise, but very frequently fastened at the back, are enumerated among the list of early autumn evening dresses.

Tucking is now employed on gowns appropriate to wearers of every age from the infant in arms to the grandmother in cap and spectacles—if caps, by the way, were not condemned in these days to total obscurity and long-gone substituted for "specs" by youthfully attired "grandmammies."—New York Post.

PULPIT AND PEW.

Bishop Potter of New York graduated from the Seminary of Virginia in 1837 and attracted attention so soon that in 1863 he was offered the presidency of Kenyon college.

The Rev. Dr. Henry Collin Minton of California, moderator of the Presbyterian general assembly, has declined the call to the pastorate of Chambers-Wylie Memorial church of Philadelphia.

Bishop Thomas F. Gailor (Episcopal) of Tennessee recently received as a gift from a woman in his diocese a jeweled pectoral cross which is said to be the finest of its kind ever made in this country.

The People's church of London has adopted a policy of inviting prominent foreign clergymen to occupy the pulpit for stated periods each year. The Rev. Dr. John T. Christian of the La Salle Avenue Baptist church of Chicago is the latest minister to receive such an invitation.

A SECRET CONFERENCE

Great Steel Strike On Eve of Settlement.

SHAFTEE REFUSES THE TERMS.

But All Other Leaders Are Ready to Accept Mr. Schwab's Proposals, and An Amalgamated President Is Expected to Yield Soon.

New York, Sept. 5.—Settlement of the steel strike practically was effected in this city yesterday. There only remains to be accomplished the technical consent of the Amalgamated association. Shaffer yesterday refused by telephone to Gompers and Mitchell to give such consent, but the expectation was that he would sanction it or be overthrown. In either case the strike will end.

Steps toward the settlement were taken first in a conference which began soon after noon yesterday in the office of Charles M. Schwab, the president of the United States Steel corporation. The participants were Mr. Schwab, W. E. Corey, president of the Carnegie Steel company; Veryl Preston of the United States Steel corporation, Samuel Gompers, president of the American Federation of Labor; John Mitchell, president of the United Mine Workers' association; Harry White, secretary of the Garment Makers' association; Professor Jenks of the industrial commission and Ralph M. Easley, secretary of the National Civic federation.

Several officials of the companies controlled by the United States Steel corporation were called to the conference chamber in the day. The conference had been asked for in behalf of President Gompers and President Mitchell, and the request reached President Schwab early yesterday.

He made favorable reply at once, and at 12:15 o'clock the two labor leaders, accompanied by the other intermediaries who had participated in the Pittsburgh meetings of last week, reached the office of the United States Steel corporation.

The session lasted continuously for more than six hours. No statement as to the proceedings was made by any of the participants. John Mitchell was the first to leave the meeting room. He positively refused to make any statement in connection with the peace plan. President Gompers and Ralph M. Easley, who followed, were equally reticent and said it had been agreed nothing was to be said.

President Schwab came out later in company with President Corey, Secretary Wren and Veryl Preston, and all successively refused to talk. President Gompers said later he would be in New York today, and that statement was taken as an indication he has not given up his effort to effect a settlement.

Strike Is Settled. One of the steel officials made this brief statement: "Nothing was accomplished by the conference. The strike is just in the same position as before it was held. Future action is with the strikers. I do not know of anything that is to be done. The steel corporation has restated its position, and the men themselves must elect what they will do."

The Press, however, says that it is able to give the conclusions reached at the conference and also is able to predicate its prediction on the same authority that the terms as suggested tentatively in the conference will be accepted and that the steel strike soon will be settled formally.

The offer of the United States Steel corporation, made through President Schwab, was as follows:

"That all men return to work at once on the basis that all union mills be continued as such and that all mills which the Amalgamated association succeeded in keeping closed be classed as union mills. Further, that all non-union mills remain nonunion mills, except those that were closed continuously."

In explanation it was said that a mill should be considered open if a certain number of men were active in it during the strike and if its output reached a certain limit. Just what limit, if any, had been fixed could not be ascertained.

Large Sum For Charity.

Philadelphia, Sept. 5.—John D. Lanahan, the well known philanthropist and member of the Drexel family, who died last week and was buried yesterday, left upward of \$1,500,000 to be divided equally between the German hospital of this city and the Mary J. Drexel Home For Aged Patients of the Hospital. The estate is estimated to be worth a little more than \$1,500,000. Paintings valued at \$150,000 are bequeathed to the Drexel institute, founded by Anthony J. Drexel.

Peruvian Premier Resigns.

Lima, Peru, Sept. 5.—Senator Osma, Peruvian minister of foreign affairs, has resigned his portfolio on the pretext of a disagreement with the estimate of his colleagues as to the present internal political situation. Nothing is yet definitely known as to the resignation of the other members of the cabinet.

Foxhall Keene Fined.

Newport, R. I., Sept. 5.—David W. Bishop and Foxhall Keene were before the district court here yesterday to answer to charges of driving automobiles faster than the law allowed. They acknowledged the offense and were fined \$10 and \$15 respectively.

British Again Buying Mules.

Kansas City, Kan., Sept. 5.—The purchase of mules for the British army in South Africa has been resumed after an interval of three months. Several hundred were selected today.

Weather Forecast.

Fair; light to fresh southerly winds, becoming variable.

FIGHT IN JAIL.

One Alleged Goebel Murderer Knocks Out Another.

Frankfort, Ky., Sept. 5.—James Howard and ex-Secretary of State Powers, convicted as Goebel murder conspirators, quarreled in jail here yesterday afternoon. Howard threw a heavy inkstand at Powers, striking him on the head. Powers was knocked down and bled profusely.

Powers was unconscious for thirty-five minutes, and it was at first thought his skull had been fractured, but Dr. De Maree said late last night that he could find no evidence of a fracture. He remained with the patient until a late hour. Symptoms of concussion of the brain developed, and a slight paralysis of the left arm and side appeared. Dr. De Maree would not state how serious he thought the wound might prove, but intimated that he considered his condition serious.

Colonel J. K. Dixon, assistant adjutant general under the administration of former Governor Taylor, who had just returned from eastern Kentucky, where he collected considerable money for the defense of both Powers and Howard, was in the room with the men at the time of the trouble. A controversy between the two men arose as to a division of the money. Both grew angry, and Howard seized an iron inkstand and hurled it at Powers with terrific force. A branch of the temple artery was severed and a gush of four inches laid open.

Both men have been in jail more than a year and apparently have been the best of friends. Howard, talking to Colonel Dixon afterward, expressed deep regret that the affair had occurred.

G. A. R. Encampment.

New York, Sept. 5.—Daniel F. Roley of Philadelphia, grand marshal of the G. A. R. encampment and naval parade in honor of Perry's victory on Lake Erie, to be held next Tuesday in Cleveland, who is in this city, announces that President McKinley has officially notified the executive committee that he will be in Cleveland Tuesday and Wednesday of next week and will participate in the events of the two days. The United States steamers Michigan, Yantic, Hark and Dorothy and the revenue cutters Essex and Morrill will be in the harbor. A feature on the lake Tuesday afternoon will be a series of yacht races. In the evening the grand ducal watch will be held near the Perry monument.

President Reaches Buffalo.

Buffalo, Sept. 5.—President McKinley entered Buffalo last night through the portals of the Rainbow City. A few of the party left the presidential train at the Central station, but the president and Mrs. McKinley, the Misses Barber and Miss Sarah Dugan, the president's niece, and the members of the reception committee were taken at once to the north gate of the exposition grounds. The screeching of whistles and the booming of guns greeted the president's train as it passed along the lake and river fronts over the Belt line tracks to the grounds. As the train flashed past the Front a salute of twenty-one guns boomed forth from Fort Porter.

Train Robbers Still at Large.

Texarkana, Ark., Sept. 5.—The six men who held up the Cotton Belt passenger train last night are still at large. The robbers evidently rode their horses up Aklin creek and left them standing in the stream. They used a handcar and went five miles north, as the handcar was found near where the train was stopped. After looting the mail and express cars the robbers returned to the creek, mounted their horses and again rode down the stream, thus obliterating their trail. The pursuing officers returned to Texarkana and reported that they could not find a clew.

A Desperate Deserter.

Muncie, Ind., Sept. 5.—Claude McDowell, who has escaped from the military authorities three times, after being arrested for deserting from the Philippine army service, is hiding in the woods between Yorktown and Gilman, and a posse of farmers will try to run him down. He has ventured out of his hiding place a few times to see friends at Yorktown. The posse, headed by Samuel Leonard, marshal of Yorktown, will go on the hunt prepared for resistance. With McDowell are said to be three other deserters.

Pipe Line For Texas Oil.

Fort Worth, Tex., Sept. 5.—James W. Swaine of Fort Worth and ex-Governor James Hogg, owners of the famous Hogg-Swaine oil syndicate of Beaumont, started for Europe today to organize a \$25,000,000 pipe line company to establish a pipe line from Spindale Top to Fort Arthur and Sabine Pass. Mr. Swaine says the company will have the products of sixty wells to draw from and expects to market 100,000 barrels daily. Operations are expected to begin Jan. 1, 1902.

Editor of Christian Advocate Dead.

New York, Sept. 5.—The Rev. Dr. William H. De Puy of this city, for over twenty-five years associate editor of The Christian Advocate, the official organ of the Methodist church, is dead of paralysis at Canaan, Conn. He had been ailing for over a year. Mr. De Puy was one of the managers of the Methodist Sunday School union. He was seventy-two years old.

Died in Front of Sheriff.

Watertown, N. Y., Sept. 5.—Thomas Le Clair, twenty-two years old, dropped dead near Gouverneur, faced by the sheriff armed with a warrant for his arrest on the charge of cruelty to animals. He died from fright.

Weather Forecast.

Fair; light to fresh southerly winds, becoming variable.

FRIDAY, SEPTEMBER 6, 1901.

Sir Henry Irving, who has recently been obliged to watch his finances closely, has just been honored with a degree from a Dublin university. Sir Henry must not expect to have all the joys of life at once.

Senator Clark's copper mine is said to produce a million dollars a month. Mr. Clark, however, appears to be one of the men with whom money is not so much a personal luxury as it is ammunition for a fight.

The Filipinos who are now added to the Philippine commission will not be able to form a majority of that body, since they are three in number to the American's five, but in case of a disagreement they will hold the balance of power, and in any case will be able to present to the commission a knowledge of the needs and demands of the native people of the islands. Their inclusion in the commission is most significant from the fact that no Filipino has ever before had a part in the supreme government of the islands.

It is likely that the public will be put in possession of a forecast of the democratic future at the annual picnic of the Jacksonian club of Omaha on September 21. Among the speakers will be Mr. Bryan, Senator Culberson of Texas and Governor McMillin of Tennessee. Mr. Hill was not invited to be present. There would be greater public interest in the oratorical feat if representative men of each of the two great factions of the democratic party were to be allowed free speech. There is a suspicion that this coming Democratic picnic of the Jacksonian club will merely be an effort to prolong the expiring prominence of Mr. Bryan. The principal orators thus far announced, Messrs. Culberson and McMillin, are from states that will probably be democratic no matter who the party's national nominee and what the party's national platform may be.

There is nothing to fight about in South America, or at any rate nothing to argue about; but that does not mean that there is not much to quarrel about, and that war may not come of it. In fact, it looks more as if war might come of it now than at any time before. Neither Colombia on the one hand nor Venezuela, Ecuador, Costa Rica and Nicaragua on the other, could give any better reason for taking the field than that the other side has done so or threatens to do so. There is no legitimate issue on which either party will join or "accept service." The governments on both sides have countenanced and probably aided unlawful attacks on each other. They have been in the "Jameson raid" business on a large scale and none of them could make a presentable showing in an international court of honor. They know it and that is what causes their apparent reluctance to fling down a formal gage of battle. If their reluctance indicated a really conservative spirit, the prospect would be better. But each in its proclamations and pronouncements has seemed more solicitous to fasten the initial provocation on the other than to maintain that forbearing attitude which might produce peace. Such apparently is the significant memorandum of explanation issued by Venezuela to the world. Realizing the moral advantage to itself, it seeks to lay the blame upon Colombia. And it seems to anticipate war.

CROP AND CLIMATE SERVICE.

Report of the New England Section of the Department of Agriculture.

The report of the New England section of the department of agriculture, on the condition of crops and the weather for the past week is as follows:

The weather conditions of the week

have been normal and seasonable in all respects. Clear skies with abundance of sunshine prevailed until the 31st, followed during the remainder of the week by generally cloudy weather. The sunshine and fair weather were much needed, and have been of much benefit to all crops.

All crops have been improved by the sunshine and seasonably high temperature. The weather has been most favorable for the maturing and ripening of fruit, grain and grass, and their harvesting. In parts of Connecticut there is some complaint of excessive moisture causing mildew and injury to vegetable and other crops on low ground, but with this exception the ground is in excellent condition for farm work and crops. In parts of Maine plowing for fall crops has commenced.

Corn continues to make an excellent growth, and all correspondents report it to be in the finest condition, and that the crop will be large. Picking and canning of sweet corn has commenced in Maine, New Hampshire and Vermont, and the crop is of excellent quality. Field corn has commenced to harden; some fields have been cut and shocked and others will be soon. Ensilaged corn has made an enormous growth, and its cutting and filling of silos has been begun in many parts of the section. Wheat has been harvested in an excellent condition in Aroostook county, Me. Oats are reported to be a light to fair crop.

Cutting and curing of the second crop of grass has been general during the week, and with few exceptions it is reported to be a heavy crop. Grass lands and pastures are green and in good condition. Fall feed and pasturage are good, and stock are in excellent condition. No complaint of grass hoppers has been made except in Sullivan county, where they are reported to have caused considerable damage on grass.

Apples continue to drop badly; nearly all reports state that they are wormy and will be a light crop. Peaches are now rotting badly in Connecticut from the effects of the cloudy, foggy, humid weather of the preceding week; there will be much loss from brown rot, and the crop will be less than expected. In other parts of New England where peaches are grown the reports are favorable. Plums and pears are reported to be a light to fair crop, although in parts of the section there is complaint of rot in plums and also in grapes.

The potato crop is generally reported to be light, although reports vary to some extent. In some sections there is little or no rust or rot; in others, potatoes are rusting badly. In Aroostook county, Me., potatoes are reported to be of good size and fine quality. Onions and celery are fair to good; melons and squashes have been injured by blight.

OBITUARY.

Mrs. Carrie R. Cole, 35, postmistress of Hampton, died Thursday morning of cancer of the stomach. She was born in Hampton, Aug. 2, 1866; the only daughter of the late Moses and Rebecca Godfrey Leavitt. Nov. 5, 1891, she was married to Myron W. Cole, who at the time of his sudden death from pneumonia in January, 1900, was in his second term as postmaster of Hampton. Mrs. Cole was appointed to serve out his term. In connection with the office she conducted the town's news agency. She was a member of the Congregational church and a most estimable woman.

Capt. Franklin F. Davis.

Capt. Franklin F. Davis of Dover, aged 65, died Thursday morning at his residence on Sixth street, Dover, as the result of a shock of paralysis sustained two years ago. Capt. Davis was a native of Farmington, but had been a resident of Dover nearly fifty years. He enlisted in the Union service Aug. 13, 1862, at Portsmouth, as a seaman, and served a year on the U. S. S. Ohio and the U. S. S. Osage. In 1864 he enlisted in the Stratford guards and served until the company was discharged in July of that year. Later he was chosen captain of the Dover artillery company and remained its captain until the company was disbanded ten years ago. He was a member of the Grand Army, Winchester lodge, I. O. O. F., and the First Parish church of Dover. He served as councilman from ward one in 1862 and as an alderman in 1889 and 1890. He is survived by his wife, five sons and two daughters.

OBSEQUIES.

The funeral of Miss Carrie E. Noyes was held from the Congregational church at Newington Thursday afternoon at 2.30 and was largely attended by relatives and friends. Rev. Mr. Small, pastor of the Congregational church, officiated. Miss Noyes was employed by the late William P. Walker, the tailor, for many years as seamstress. The floral tokens were profuse and beautiful. Interment was in the family lot at Newington cemetery by Undertaker O. W. Ham.

The Herald has all the latest news

FISHED WITH LINCOLN.

How "Old Abe" Killed Time on Stumping Tour at Exeter.

Gen. William P. Chadwick of Exeter, head of the late Kearsarge testimonial commission, received a pleasant call from a former townsman, William Wainwright, secretary of the association of the survivors of the crew of the old Kearsarge in her engagement with the Alabama. In the course of conversation Mr. Wainwright related this interesting incident.

One afternoon in 1858 Mr. Wainwright sat on the bank of Exeter river near the mill pond, fishing for eels. They were biting eagerly and Mr. Wainwright was kept busy in tending his two poles.

Late in the afternoon he noticed standing on Great bridge a stranger, who appeared deeply interested in the fishing and soon came to Mr. Wainwright's side and asked the privilege of sharing in the sport.

Mr. Wainwright promptly handed him one of his poles, and the two fished on with good luck. As the afternoon was closing the stranger broke his pole, an alder bough, and vainly tried to make Mr. Wainwright some compensation.

That evening there was a political meeting in the town hall, which Mr. Wainwright attended. Great was his surprise to recognize in the speaker his fellow-fisherman of the afternoon, Abraham Lincoln. Mr. Wainwright regrets that he did not keep the broken alder pole.

AT CHRIST CHURCH.

A devotional service for communicants was held at Christ church on Thursday evening. Directly at its conclusion, a very pleasant social gathering took place in the guild room. It was quite informal and therefore was all the more enjoyable. It was participated in by a large number.

IN AID OF THE STEEL STRIKERS.

The Portsmouth branch of the Granite Cutters' union are to give a grand ball in Philbrick hall next Thursday evening for the benefit of the steel strikers. The affair is in the hands of an energetic committee, who are hustling to make it a great success.

"C. C. C." on Every Tablet.

Every tablet of Cascarets Candy Cathartic bears the famous C. C. C. Never sold in bulk. Look for it and accept no other. Beware of fraud. All druggists, roc.

PAINTERS' ATTENTION.

Journeyman painters of Portsmouth, desirous of joining the Union, are requested to meet at G. A. R. Hall, Daniel street at 7.30 p. m. sharp, this Friday evening, for the purpose of organizing. Come prepared financially. PER ORDER OF THE PRESIDENT.

The Exeter correspondent of the Boston Globe says that Gen. William P. Chadwick has been urged by many of the foremost republicans in the state to be a candidate for governor in the coming campaign, but has as yet made no decision in the matter. Not yet forty, Mr. Chadwick was a leader in the two legislatures preceding the present, was judge advocate general on Gov. Rollins' staff, and was the chairman of the late Kearsarge testimonial commission. He is a lawyer by profession.

THE OPHIR'S CRUISE.

St. Vincent, Cape de Verde Islands, Sept. 5.—The Royal yacht Ophir, with the Duke and Duchess of Cornwall and York on board, and escorted by the British cruisers Diadem and Niobe, sailed today for Quebec. According to the programme, the Ophir is due to arrive at Halifax on September 16th and at Quebec on the 21st.

CALLING SCHLEY'S WITNESSES

WASHINGTON, Sept. 5.—Telegrams were sent out by the navy department today to fifteen witnesses asked for by Admiral Schley for the approaching inquiry, to proceed to Washington for the purpose of conferring with the admiral's attorneys. About all are located in the east, most of them in Newport, Philadelphia and New York.

HOTEL BALCONY COLLAPSED.

VICTORIA, B. C., Sept. 6.—The steam or Mierowa brings news of a serious accident that happened in Quiranda last month. The Imperial hotel balcony collapsed while 150 people were on it, and it is estimated that eighteen sustained broken limbs, while forty nine others were more or less seriously hurt.

THE SHOALS MEETINGS.

A Lively Interest in the Matters of the Woman's Federation.

The meetings of the N. H. Federation of Women's clubs continued to be of intense interest to the members gathered at the Shoals throughout the day and evening of Thursday and many clubs throughout the state will feel the influence of that day's deliberations in their work during the coming year.

The business meeting and council, held at 9 a. m., spent much time considering the advisability of attempting through the state federation, to introduce courses of civics into the public schools with direct bearing upon civil and municipal reform, and the matter was placed in the hands of a committee of which Miss Martha Kimball of Portsmouth is the representative of the Grafton club.

Another matter of considerable discussion was a change in the taxation and consequent representation of the individual clubs in the state federation.

The social meeting of the evening was the crowning event of the delightful gathering when Mrs. Waldo Richards of Boston, so well and favorably known in Portsmouth, gave readings from Jas. Whitcomb Riley, Ruth McEweny Stuart, Rudyard Kipling and others. Her rendition of Riley's story of a bear as told by the boy himself was given by request and was the happiest selection in her exquisite repertoire.

In connection with the program given by Mrs. Richards were musical numbers by Miss Alice Hanscom and Mrs. Owen, both of Portsmouth. Miss Hanscom's execution was as usual a delight and won much deserved praise. Mrs. Owen was never in better voice and her selections were admirably suited to her fine contralto which together with her charming simplicity of manner was the comment of the evening while Mr. Doolittle proved a perfect accompanist.

Resolutions were passed and accepted, in which every one was included, not forgetting the manager of the Oceanic, Mr. C. S. Ramsdell, to whose courteous attention the ladies were much indebted for both comfort and pleasure.

It was a matter of regret that so few Portsmouth ladies availed themselves of the opportunity of consulting with the club women of other parts of the state regarding the best work to be undertaken.

The club movement is neither a fad nor a folly but a widely spread educational movement which has enlisted the efforts of the best and most intelligent women of the United States and England. Without social aspirations or prejudices the club offers to all women the result of combined effort for the advancement along educational art, science, economics or ethics, and it asks every intelligent woman in the land to unite in the effort to bring into every community some advantages and privileges which could not be obtained in any other way.

The great work undertaken and carried out by the N. H. State Federation during the past year was the passage of a bill appropriating money for the erection of a home and school for deficient children. The success of this undertaking was due largely to the untiring efforts of Mrs. Bancroft of Concord, the former president, and Mrs. Rodgett of Franklin, the present president of the N. H. Federation of Women's clubs.

Among those in attendance at the meeting were Mrs. Micah Dyer of Boston, Mr. and Mrs. Yardley of Sunapee and Orange, N. J., Mrs. O. C. Moore of Nashua and Mrs. Olive Rand Clark of Manchester.

Fishing with electric light rays for bait is the latest feat of science, says the New York Journal. The inventors of the light that is to rob the sea of its inhabitants say it will revolutionize the fishing industry. The Captains Courageous whose praise Kipling has sung are to be no more. Instead, a handful of electricians will go down to the sea, press a button, and, lo, hundreds of fish, drawn by an irresistible power, will find themselves flapping around the deck of a boat.

This power is the Yale marine arc light. Its inventors are Irving A. Bur-

Electrical Fishing Device.
Dick and Francis G. Hall, Jr., Yale boys, who were graduated last year. The practical possibilities of the light were explained by W. S. Mead, the millionaire, and the building of four boats designed specially for this kind of deep sea fishing is now under way.

On each of the boats there will be four electric lamps on cables 200 feet long. Each light will be lowered in a net which will be automatically opened. The weight of the fish will close it. Each boat will be equipped with a complete electric lighting plant, and wherever possible wood will be used to render sound. For night fishing the decks will be brilliantly lighted.

The lamp consists of an upper mechanism chamber solenoid and other mechanism. The lower-chamber is enclosed by a glass globe, which is hermetically sealed to the upper chamber by rubber gaskets. Inside the lower chamber are placed an inner globe and the carbon. The lamp is 22 inches over all and is encased by a handle seven inches in diameter. The metal parts are of gun metal. The glass globes are designed to withstand a pressure of 500 pounds, insuring safety at a depth of 1,000 feet. The greatest depth to which any diver is known to have descended is 204 feet. The feeder cable is led into the mechanism chamber through a rubber packed stuffing box, and when submerged the lamp is, of course, water tight.

A Chance For Electricians.
A Berlin tramway company offers prizes of \$750 and \$375, respectively, for the best speed indicators suitable for use on their cars. An additional royalty will be paid to the owner of the successful instrument.

To Make Ozone by Electricity.
A patent has recently been taken out in Germany for the production of ozone by the electrification of the air by a process which reduces the heat generated and, therefore, the formation of oxides of nitrogen to a minimum. The apparatus to be preferred has its electrodes covered with a very large number of points and separated by glass plates. The great point appears to be to make the electric discharge as nearly invisible as possible.

Here's a Pleasant Prospect.

This summer's excessive heat is explained by a Chicago scientist in a way calculated to give both chills and fever to that part of humanity which accepts his explanation. He asserts that the earth in its annual revolution about the sun is approaching nearer and nearer to that orb every summer and getting farther and farther away every winter. The ultimate result, he avers, will be that the inhabitants of this sphere will be alternately baked and frozen until no living being is left.

The use of gas to make the hair grow is one of the latest medical discoveries. The gas employed is oxygen. A large cap fits tightly round the head and is supplied with oxygen from a bag which is slung over the patient's shoulders. It is worn for a few hours every day and even in cases of absolute baldness is said to produce a more or less luxuriant crop of hair.

The discovery was made at the Oxygen hospital, London. The gas is used for the cure of quite a number of diseases. A woman was undergoing the oxygen cure for skin disease, and one of her arms had for many days been placed in a light airtight box filled with the gas. It was soon noticed that on that part of the arm that was unaffected by the disease the growth of hair was much stimulated, and this naturally suggested oxygen as a cure for baldness.

The first experiment was made upon a woman who had completely lost her hair, and it was found that after a few weeks' treatment there was quite a strong growth.

PORTSMOUTH'S SECRET AND SOCIAL SOCIETIES.

WHEN AND WHERE THEY MEET.

A Guide for Visitors and Members.

OAK CASTLE, NO. 4, K. O. G.

Meets at Hall, Peiros Block, High St., Second and Fourth Wednesdays of each month.

Officers—Willis B. Mathes, P. C.; Robert M. Herriek, N. C.; Allison L. Philney, V. C.; Charles C. Charles, H. P.; Fred Heiser, V. H.; Fred Gardner, K. of E.; Samuel R. Gardner, M. of K.; George F. Knight, S. H.

PORTSMOUTH COUNCIL, NO. 3, O. U. A.

Meets at Hall, Franklin Block, First and Third Thursday of each month.

Officers—Wm. P. Gardner, C.; Chas. B. Allen, V. C.; Frank Pike, R. S.; Frank C. Langley, P. S.; J. W. Marden, S. H.; Chas. W. Hanscom, H. P.; Malcolm D. Stuart, Ex.; Wm. C. Berry, I. L.; Wm. Emery, O. P.; Harry Iversum, Trustee.

OSGOOD LODGE, NO. 43, I. O. O. F.

Meets in Odd Fellows' Hall every Thursday evening at 7:30 o'clock.

Officers—Frederic B. Higgins, N. G.; Charles J. Pendergast, V. G.; Howard Anderson, Sec.; Edwin B. Prime, Treas.; Albert C. Plumer, Fin. Sec.

The Degree Flair will be displayed when degrees are to be conferred. Watch for it. All brother Odd Fellows not members of the Lodge are cordially invited to attend the Lodge meetings and are assured a cordial greeting.

PORTSMOUTH LODGE, NO. 97, B. P. O. E.

Meets at Hall, Daniel St., Second and Fourth Tuesdays of each month, except Second Tuesday of June, July and August, and Fourth Tuesday of September.

Officers—True W. Priest, E. R., H. F. Dow, T.; I. R. Davis, S.

A Whisky Train.

The various jobbing houses in the east are now prepared to fill orders for the Famous Fine Old

KY. TAYLOR WHISKY.

The largest shipment of Whisky in cases in the history of the Wine and Spirit trade has just arrived in Boston from the distillers, WRIGHT & TAYLOR, Louisville, Ky. This shipment consisted of four cars and a small train of the Fine Old KY. TAYLOR WHISKY, containing 20,000 cases, and an advance car containing 250 cases, a total of 20,250 cases, for May orders and were distributed as follows:

W. T. Connor Co., Boston, 500 cases	C. L. Richardson & Co., Boston, 400 cases
Conway & Co., " 300 "	John Lyons & Co., " 100 "
Carter, Carter & Meigs, " 100 "	Eastern Drug Co., " 100 "
W. T. Connor Co., " 100 "	J. R. Hargrave & Co., " 100 "
H. Swartz & Co., " 100 "	Miscellaneous, " 575 "

SNAKE'S TASTE IN MUSIC.

Rapture Shown by a Serpent Over One of Chopin's Nocturnes.

"During our first year in Colorado," said the ex-ranchman's wife, "my daughter and myself were desperately lonely, and for the girl's sake more than for my own I used my husband to try his utmost and get a piano brought there. A Colorado ranch was then much farther from any point of civilization than it is today, and for a long time the feat seemed hopeless, but at last, after long and tedious effort, an instrument found its way to our wilderness.

"My daughter had a fairly good musical education before we went to the ranch, and after the arrival of the piano she spent all her leisure time at it. One evening, about two weeks after it came, she had spent a couple of hours practicing some of Chopin's waltzes; then she struck into the nocturnes. Chopin is my favorite among the composers. While I sat there listening intently, my elbow resting on a table beside me and my head on my hand, I felt myself impelled to go on my own. I used my husband to try his utmost and get a piano brought there. A Colorado ranch was then much farther from any point of civilization than it is today, and for a long time the feat seemed hopeless, but at last, after long and tedious effort, an instrument found its way to our wilderness.

"I moved cautiously, peered out slowly and drew back suddenly. A huge snake was coiled up close under the window. Its body was perfectly still, its head poised in a listening attitude and swaying slightly from side to side, as if in rhythmic movement with the music. I did not see this all at once. I took in the situation after I returned to the window and stood there watching the creature out of range of his eye and wondering if my presence would make itself felt and divert its interest from the music. But no; I don't believe even speech would have broken the spell. The creature seemed dazed, entranced, fascinated!

"After watching him for a time I went quietly over to my daughter and without startling her by so much as a hint of my strange discovery I asked her to desist for a few moments from the minor and semibreve notes she was playing and strike into one or two lively airs. She did so, while I returned and watched the reptile.

"After a couple of minutes of the rattling music the snake began to grow restive. It reared its head, beat it from side to side and showed other symptoms of restlessness or anger. The music kept on; the snake began to writhe and slither as if in distress; finally it uncoiled and glided away out of sight in the underbrush.

"When I told my discovery to the male portion of the family, they were all ready to watch for that snake and kill him at the first opportunity, but I forbade that. I desired to make a further study of his love of music, and I did so. I prepared my daughter to look for his advent again, and his snakeship did not disappoint us. Again and again we watched him creep to his musical rendezvous, and again and again we tested the quality of his musical tastes. We proved beyond a shadow of a doubt that low, sweet music, minor, sad or weird notes, fascinated that snake, and that anything lively or noisy repelled him.

"I grew positively interested in the study and even found myself bestowing a sort of human pity on the reptile, but it resulted in no good, for the other members of the family did not share my feelings, and I must finish my story by saying that the creature's love for Chopin's nocturnes cost him his life during one of his visits under our window."—New York Sun.

The World's Oldest Rosebush.
The oldest rosebush in the world is at Hildersheim, an old town in Hanover. It was planted more than 1,000 years ago by Charlemagne in commemoration of a visit made to him by the ambassador of the caliph Haroun-al-Raschid of "Arabian Nights" fame. After it had become a flourishing vine a cathedral was built over it, the date of the building being doubtful. It is known, however, that a coffin shaped vault was built around its sacred roots in the year 818, the vault and bush surviving a fire which destroyed the cathedral in 1140. The bush is now said to be 28 feet high and to cover 32 feet of the wall. The stem, after 1,000 years' growth, is only two inches in diameter.

WILL REGENERATE FOUL AIR

Novel and Important Invention of Two French Scientists.
It appears from an article in a recent number of La Nature that some time last year Desgres and Balthazard called attention to a substance which is used in dyeing and which in contact with water becomes decomposed into oxygen and soda. The substance is called binoxide of sodium, and in some experiments performed at the Faculty of Medicine lately it was shown that animals could be kept alive for hours in closed vessels by regenerating the exhausted air with this chemical. This led to the discovery that by throwing binoxide of sodium in small quantities into water in a hermetically sealed vessel a sufficient quantity of oxygen was discharged for respiration, while the soda simultaneously formed fixed the expired carbonic acid of the air, and that at the same time a destruction by oxidation of the toxins in the gas from the lungs took place.
Following up these discoveries, Messrs. Desgres and Balthazard have succeeded in devising an apparatus that will insure life in a medium other-

AIR-RENEWING APPARATUS IN POSITION.
wise irrespirable, in mephitic gases as well as in water, and though this has been done by a number of devices, in all of them it has been necessary after a short time, say an hour, to employ a pump to re-inforce them with air. But in the arrangement of the above named inventors the apparatus itself suffices, for it manufactures new air as it is needed without the intervention of any auxiliary machinery.
The apparatus is composed of three distinct parts combined into one. There is a prismatic steel box to contain and distribute the binoxide of sodium as it may be required, which is divided into compartments by ten horizontal shelves, one above the other. Each of these carries a supply of the chemical. With them there is connected a clockwork movement which causes each one to tilt in succession at definite intervals of time. This causes the contents to fall into a cubical steel box containing water, and a small fan actuated by an electric motor operated by accumulators produces a continuous circulation of the vitiated and regenerated air in the apparatus and in the small space inclosing the subject. As the air becomes somewhat heated in the process of its regeneration it is made to pass in its exit through a refrigeratory, which reduces it to its normal temperature.

The Kitson Oil Lamp.
The Kitson oil lamp, which seems to be meeting with some favor in London, Portland place being now lighted by means of it, uses petroleum stored in cylinders partly filled with air under 40 or 50 pounds pressure. From the cylinder a narrow bore copper pipe is carried to a vaporizing tube over the burners. When the cock is opened and the burner lighted, the oil and air which are forced by the pressure into the heated vaporizer are vaporized and are then burned as a gas for heating an ordinary incandescent mantle-like the Welsbach, for instance. The makers claim that the Kitson lamp is for equal candle power the cheapest form of illumination known.

The making of biograph film is an elaborate and delicate process, says the Philadelphia Times. First is manufactured a celluloid ribbon of the required width and transparency, coated on one side only to an invariable thickness of one-thousandth of an inch. It is sensitized in an immense dark room in an absolutely dustproof factory. The emulsion consists of a solution of bi-chloride of gold floating on great glass tables 100 feet in length.
When dried, the film is wound on spools in boxes, and no gleam of light must strike it until at the proper moment it is held behind the camera lens for one-seventieth part of a second every two inches of its entirety. Even then it must be guarded from stray beams until developed and fixed in the biograph factory.
Very Costly Camera.
During the sojourn of the sultan of Morocco in London an English firm made for him a camera at a cost of \$10,500. It differed in no way from the ordinary quarter plate-size (2 1/4 by 4 1/4) except that all the metal work was constructed of gold, including the screws and the holders for retaining the plates.
A Mammoth Plate.
A photographic plate 8 feet long by 4 feet 8 inches wide has recently been made. This plate, which is said to be the largest ever made, is to be used in making a photograph of St. Paul and Minneapolis from a balloon.

A writer in What to Eat gives an interesting summary of the food value of different vegetables. It seems tomatoes rouse a torpid liver and do the work ordinarily of a doctor's prescription.
Lettuce has a soothing, quieting effect upon the nerves and is an insomniac remedy.
Potatoes should be eschewed by those who "have a horror of getting fat," as that is one penalty of eating them.
Water cross is a good all round brace up for the system.
Spinach has medicinal properties and qualities equal to the most fudigo of all blue pills ever made.
Parsnips, it is now contended by scientists, possess almost the same virtues that are claimed for sarsaparilla.
Beets are fattening, even a moderately learned man will explain, because of the sugar they contain.
Asparagus is efficacious in kidney ailments to an extent that is not yet perhaps thoroughly appreciated.

A New Vegetable.
Voandzou is the title of a curious plant which is now interesting several European scientists. Of these the most enthusiastic is M. Balland. He recently read a paper about voandzou and pointed out that this plant is the only one which is known to possess in proper proportion all the elements that are required to form a suitable nourishment for man. Voandzou is scientifically known as clycine, or Voandzia subterranea, and is a native of tropical Africa, where it is widely cultivated by negroes.

Fruit For Breakfast.
A writer in The Pilgrim says: I beg to enter a protest against the habit of serving fruit to adults or children as the first course for breakfast. "The condition of the juices of the stomach and intestines in the early morning are, in my judgment, not such as to make fruit very digestible at this time. Serve your grain of whatever kind you please, then some bread and last of all fruit."

SOME CARNEGIE METHODS.

Quick Work In Unloading Ore From the Cars at the Furnaces.
James N. Hatch in The Engineering Magazine tells how ore is handled at the Carnegie furnaces. He says:
When the ore trains reach the Carnegie furnaces, they must be unloaded as quickly as possible to save cars and save storage track room. The cars are stopped on the platform of a tippile and clamped down to the track. The tippile is then set in motion, lifting a section of the track, loaded car and all, and turning it through a vertical circle until the car is turned upside down and the 50 tons, more or less, of ore are emptied into bucket cars, which stand on a track alongside. This machine is guaranteed to handle 300 cars a day of ten hours.
These bucket cars are hauled away to the side of the stockyard and stopped under the cantilever of the largest bridge tramway ever built. This tramway has a trolley travel of about 500 feet and can pick up the bucket with its load of 22,000 pounds from the car and carry it to any part of the yards. This load of over ten tons can be lifted from the ground at the rate of 250 feet per minute, can be moved across the bridge at a speed of 800 to 900 feet per minute, and the whole machine, load and all, can be moved up or down the yards at a speed of 75 to 100 feet per minute.

A Novel Lightship.
A new department in lightships, it appears, is about to be inaugurated at Otter Rock, Italy. The ship is to have no crew and is to be worked by the compound gas system. Two large gas holders built upon it will contain as much gas as will light the lantern for several months. As the gas escapes from the holders to the lantern it operates a mechanism by which a bell placed in a belfry on the deck is rung. These rocks mark a particularly dangerous part of the coast, and the experiment will be watched with much interest.

Light From Liquid Gas.
Important scientific advances have been made by Walter Scott Strowger, the inventor, in studying the nature of his new liquid gas. He has, it is reported, succeeded in liquefying it at pleasure and in producing it by cold chemical process. It is claimed he can also compress it so that a quantity can be placed in a bottle, and by placing a pipe with a gas burner on top the tap may be turned and a brilliant light will result, as from the regular gas of commerce.

Oil In South Africa.
Consul General Stowe of Cape Town has transmitted a report from Mr. Seavill, mining and land agent of Kimberley, on the discovery of indications of mineral oil in South Africa. The supposed oil belt extends from the Ceres district across the country to Mossel bay, on the coast, 250 miles east of Cape Town. The geological formation is the Devonian period throughout, locally known as the Bokveld beds.

A Light Wave Phenomenon.
A curious phenomenon has been reported by men on outpost duty three miles from a military station in the Transvaal. On still, silent nights such as come often in the high veldt a distinct purring was heard as the station's searchlight was turned toward them, the sound increasing until the light rays passed directly overhead. The observers were inclined to attribute the sound to light waves impinging against the air.

THE COST OF A SONG.

Over and over and over the songs of our life are sung.
The same today as in ages gray when first the lute was strung.
The same today as in ages gray the singer's high-cast art
Is to song of man and the soul of man from the depths of the human heart.
To sing the song that lingers in his heart from that far day
When men were brave and women fair and life was in its May
Is the singer's part of gladness when he gives his soul to man
In a song that lives because sweet pain has changed his earlier plan.
The husk, the harvest and the bin and all life's spreading plain
To the singer must be singing if he man's soul would gain.
Mac in his soul unsatisfied strives for what cannot be;
He grasps at a star and holds in his hand a drop from the sounding sea.
Over and over and over, since the towers of time were old;
Over and over and over, since the cloud gave the sun its gold,
Over and over and over, since the fuses of our lives began,
Has man gone out from the marching host to sing of the soul of man.
The singer who sang of the pyramids prime has gone the ways of men,
But the sun and moon and human heart are just the same as then.
The heart of man is a restless sea of varied tides and clime,
And only when its depths are stirred comes song on the shores of time.
Over and over and over, since wrong had realm and state;
Over and over and over, since the shades on the living wait;
Over and over and over, singing of sun in the rain,
The chosen of God are bringing the voice of song from pain.
—James Riley in *Yonkers Statesman*.

THE ROOKIES.

A TALE OF WAR.

"Holy gorillas!" exclaimed the major, looking askance at the file of rookies who had just halted in a ragged line before him. "Is this what I left my stool for? I was tired of that stool, too, but I didn't know what was before me. No, I didn't know?"
The major glanced down the file again and sized them up. First came a pale faced boy in store clothes and a collared collar. Beside him stood the huge hulk of a longshoreman, next the nervous, wiry frame of a cow puncher, next a fat boy who for all the world might have just stepped out from between the covers of some musty copy of "Pickwick Papers," next a youth with a handsome pair of black eyes and a fine frank face, next a lank fellow of twenty odd years with the look and the lean of a mountaineer, next—"Good Lord!" exclaimed the major. "An Indian, if I'm alive! And this is what I'm up against. For heaven's sake, sergeant, take 'em away. Anywhere—yes, to the barracks or to the devil, if you wish; but the next time you bring 'em out have 'em in khaki or I'll go mad!"
The sergeant saluted and dragged the batch across the green to what the major had called the barracks. These were six rows of milk white tents perched upon the crest of the greenest of hills, and that day they were silhouetted against the bluest of blue skies and a deeper blue sea.
The major stood for a time gazing despondently after the batch, but when he caught sight of the blue sea and sky his face brightened, and with a spring in his steps and a song on his lips he climbed to the hilltop to one side of the camp, sat down on a boulder and gazed seaward. The sun warmed the major's back, the beauty that spread before him warmed his heart, and soon he stretched out upon the ground with a small stone as a pillow and went to sleep. By and by, how long does not matter, he was awakened by voices and beheld before him the rookies sitting in solemn conclave a little way down the hill. The pale faced boy was speaking.

"He ain't much for looks."
"G'wan," interrupted the longshoreman. "Did ye mind thim harrums of biln an' the snap in thim goggles? Did ye mind 'em? I ask ye. Well, ye kin look out for 'im ef—ef, moid ye, phwat O'm tellin ye—we gits into onny fightin'."
The cowpuncher opined of the major words too dreadful to print. They were so unusual that even the longshoreman, he of the picturesque verbiage, was shocked into swallowing his quid without a gasp and dropping his pipe.
It was the fat boy's turn, but he only snored. Then the black eyed youth spoke up.
"Tom," he said to the cowpuncher, with a sly twinkle in his eyes, "we wouldn't mind your cursing if we could only understand what you said. Won't you say it over again?"
The longshoreman aroused at that, and stretching his long arm, he grasped the cow puncher by the collar and asked:
"Was it that little major ye was cussin' in that way? Ef it was, jest ye swallow it. Moid ye, darlin', it's Mike O'Doolihan of the Red Star loine phvats a-talkin to ye, moid."
Then Mike dropped the cowpuncher, who fumbled around his hip pocket for a moment and then lay still.
The black eyed youth grasped Mike's hand, and the talk passed to the mountaineer.
"Be he a revenoo man?" he asked.
"I've shot at a many a one of 'em, but never met 'em face to face."
The cowpuncher looked gratefully at the mountaineer, and that time his hand lay upon his hip pocket meditatively.
"Rifle?" he asked.
"Yep," said the mountaineer.
A moment of silence, and the Indian

glanced from one to the other, grunted and rolled over to sleep, with his head resting upon the upturned stomach of the fat boy. This act sent the major into a fit of laughter. He could not get up if he would, so he began to roll down the hill as he had done many a time in his boyhood, and presently he landed against the guy ropes of his own tent in "others' row." The next time that the major looked upon the file of rookies it was with keen interest.

Now, between the major and this file of rookies came a captain, two lieutenants, the usual complement of sergeants and a corporal or two. Of all these none is of any account in this yarn except the first sergeant, because he trained the rookies and made them what they were when they and the major came to a perfect understanding. In the meantime the captain had bit the dust at the stroke of a Mausey but, let, one of the lieutenants had died of fever, and the other one had disappeared. As for the other fellows, no sergeant but a first sergeant is any good for a year, and a corporal—he's good for nothing at all.

This sergeant was named Grimes. How old he was no one but he knew. He was a soldier, though, every inch of him, and when the scratch came it was he who played lieutenant to the major.

That came about because when the battalion deployed on the morning of that memorable day in the jungle on the banks of Hell river Grimes' company took the center of line. It was then that the sergeant and the major had a tiff.

"Major," said Grimes, "git out of the way of 're when them regulations say as ye must. In there where ye be ye'll be kill'!"
"Will not, Grimes," said the major. "Did I get behind when we eluded Geronimo?"
The sergeant gave a sardonic grin.
"That ye did not, major, God bless ye, but ye've got to this time." With that Grimes encircled the major's waist with his arms and made to bear him to the rear, while the company lay smothering in the pampas, burning inside with desire to be up and at the rear behind the sickly yellow flag that flopped beyond the hill.

"Kittle hill, they calls it, eh?" said Mike, the longshoreman, to the black eyed youth.
"Hisht, phwat's that?"
This time it was the major speaking. "You knew I'd do it, Grimes," he said, "but you wouldn't heed."
"By the 40 articles, it's your right," said Grimes, splitting off a discarded tooth, "but ye are behind me line."
And he was, but the best Grimes could do could not make the major lie down. The line lay between Hell river and the hill, a thousand miles or more from the hill where we left them awhile ago, with the rookies on one side snoring in the summer sun and the major rolling down the other side threatening at every turn to burst his waistband with the laughter he was holding in. They were in another eline, too, under a sun that burned like a scourge. Mosquitoes? No, they were Mausey bullets, clipping at the tops of the pampas grasses, scattering the delicate blossoms on the heads of the file. Behind them were other files, some of them wading Hell river knee deep in mud and shoulder deep in water. But that didn't save them, for the fellows behind the yellow flag on the hilltop had got the range, and almost every minute some one of them went down to settle there in a slimy grave. Some cried out, others only groaned. Some were silent and just sank, arms, haversacks and all, to join the roll of the "missing after the fight."

But not one of the file in the front looked like a rookie. The fat boy was nearly as fat as ever, and his little pig eyes gleamed savagely as he strove to get two fat fingers inside his trigger guard at once. Now and then one of them swore. It was always the cowpuncher first, until he laid down his gun and crawled to the rear. A Mausey took him in the skull. One kick, and he lay still.

The lank rookie shuddered, and, impelled by an impulse he did not understand, he rose to bring the cowpuncher back.

Zing, zing, zing, zing!
"Listen to them!" sang out the black eyed boy. Down went the lank boy, his brains spilling into his hat. Then there were five of them.

Where all the rest of the company was only they and maybe their officers knew. The pampas hid everything. They might have charged. History says they did, but there is a dispute on a point of precedence in the matter. Some say that the seven rookies and the major and Grimes were left behind, but the major said no, and what were left of the lot agree with him. It was the mountaineer's turn to go. It seemed, after the others had quit the fight. He saw those two lying side by side, and his nervous force left him. But he was no coward. He did not shrink, as he might have done and often had doubtless. He got a good grip on his Krag, staggered up until his great length raised him even above the tops of the pampas. Then he doubled up like a jackknife, clapped his hand to his throat and rolled over, with his head next to the Indian's ribs.

"God!" said Mike and glanced down the file. There were beside him the Indian, the fat boy and Steve, with his black eyes flashing. They said nothing more, but lay listening to the major and Grimes, who were at it again.
"Now, with Geronimo," Grimes was saying, "we didn't have to wait for no orders. We got 'em first them days, eh, major? It's heads we wants. It'll come, major, an afore long they'll be after makin' major generals an sich out'n sergeants. Sergeant, I tell ye! Be ye listenin to me?"
Just then came a tremendous shouting to the left. The big guns began to boom, and overhead the remnant of the major's file saw the shells sail and

burst. One of them exploded directly overhead, and the fat boy yelled.

"Keep it up, young un!" cried Grimes. "It'll do ye good."

The major began to get excited, and Grimes, watching him eagerly, whispered to the file:

"Git yer knees under ye, boys. If ye fall us, it'll be worse'n a settin' up ye'll get when the day's over." They got their knees under them, those four, and lay ready to spring. Grimes could not keep his superior down, try as he would, and when a hoarse shout sounded near them and a white haired old man, alone and on foot, broke through the grass before them, the major shouted, "Charge!" and disappeared.

Up they all went, but they fired never a shot until the slope of the hill brought them up, when, if they had looked back, they would have seen Hell river winding its sluous way amid the tangle, bearing on its muddy surface a straying and melancholy fleet of empty campaign hats, sole signs of those who had worn them. But there was no such thing as stopping until they were entangled in the barbed wire guard, half way up, where they stood in the line supremely helpless, but supremely heroes. Not one had a knife save his bayonet. But there hopped the yellow flag, looking green now, in the rising mist of the smokeless powder. How it mocked them only they can know. They clubbed their rifles and beat the tangled wires down. Then they ran, tumbling, clogging and crying, until the new turned clouds on the earthworks beneath the flag met their eyes. The major lunged up his arms, and the five—the sergeant had picked up the mountaineer's rifle—dropped down and fired. One volley rang out, then another, another and yet two more, and they paused to load again.

A bugle called the charge, and, still cramming the cartridges home, the little band rushed on. Another bugle call, and Grimes yelled:

"At 'em, at 'em, at 'em, er we'll get left!"

Then they were where the mist and the smell of the fight held them complete. One more rod, and their feet would be on dead earth. Grimes waved his rifle over his head, and the four rookies formed a phalanx. In a time of peace Grimes would have laughed at the show they made. Funny? Granted, but funny as grief is when a man's laugh grates and makes your blood run cold.

Then they marked time to the rhythmic swing of Grimes' rifle, with the bullets cutting the air between their very elbows.
"Charge!" cried the major, and Grimes' rifle bumped his forehead in a salute. And the phalanx charged evenly, step by step, stride by stride, until the major gave a yell that had been Geronimo's and their feet were upon the yellow clouds.

"Fire!" yelled Grimes. Five volleys blazed forth, and in a twinkling there was not a yellow face to be seen before them, for the trench was empty.
There had been six of them at that supreme moment, and some hours later there were only four, but then the sun had gone down, and in the faroff sky over the water the first lone star of the Southern Cross burned like a watch lantern against the blue black sky.

All about them the campfires burned, and over the hill and valleys hummed the sounds of thousands of men resting on their arms. The four had dug two graves just outside the breastworks between the trench and Hell river, and in them they laid with reverent hands the bodies of the two heroes—the fat boy and the Indian. Then they covered them over with the yellow earth and left them where they had fallen just outside the works at the moment of victory.

"What a death to die!" said Steve to the major, and in reply, while Mike Grimes and Steve stood with uncovered heads, the major lifted his face to the stars and uttered Geronimo's yell.

Then they lay down to sleep.—New York Sun.

Her Compliment.
"Talk about your corduroy roads," said a young actress who played here recently, "just let me tell you about the jolt the chambermaid dealt me the other morning. She has been letting me overdraw my towel account right along, so I felt that I was due to show my appreciation, and I gave her a pass to the show. She had a seat just to leeward of the orchestra leader, and I copped her out for my bulleseye the minute I came on. I don't want to give myself a curtain call, but I do get them going the minute I cut in in that part, and there's something doing the whole time I am on the stage. I worked overtime last night showing that chambermaid the real thing. I was it. I was the whole programme, with footnotes. I made the bit of my life. This morning I met her in the hall.
"Did you enjoy the performance last night?" I asked, giving her the cue to hand me out a few well chosen testimonials.
"Oo, yes," said she. "I thought it was lovely."
"Did you? I asked, getting ready to bow my thanks.
"Oo, yes," she went on. "I liked it ever so much. The scenery was just perfectly grand!"—Washington Post.

Didn't Change the Name.
A man named Palmer a long time ago made the English town of Rugeley notorious by an atrocious murder, and a deputation of the inhabitants waited on the home secretary with a petition for leave to change the name. The minister hesitated and asked what name they proposed to substitute. They replied that they had not decided.
"Oo, yes," said she. "I thought it was lovely."
"Did you? I asked, getting ready to bow my thanks.
"Oo, yes," she went on. "I liked it ever so much. The scenery was just perfectly grand!"—Washington Post.

Autos Enter For Long Run.
Chicago, Sept. 5.—Fifteen automobiles have so far entered for the tour of the Chicago Automobile club to the Pan-American exposition. The start will be made Saturday morning.

COLUMBIA WINS AGAIN.

By Seventeen Seconds, Corrected Time.

CONSTITUTION IS HANDICAPPED.

Has Hard Luck With Her Sails, but Makes a Good Showing Notwithstanding—Will Probably Be Chosen to Defend Cup.

Newport, R. I., Sept. 5.—As a result of the race between the Constitution and the Columbia it is given out by the regatta committee that there will be no race today, and it is a question if there will be any more.

When asked if any decision had been reached by the committee as to the election of a boat to meet the Shamrock, a member of the committee said that no decision had been reached, and they could not say what boat would be selected. The general impression seems to prevail in yachting circles that, despite the fact that she has been beaten by the Columbia, the Constitution will be the boat, on the theory that intrinsically she is the better of the two if she can only be got in shape in time for the cup races. Herreshoff is insistent that the new boat is the better of the two and practically guarantees her so.

The Constitution sailed a capital race yesterday against the Columbia over a course fifteen miles to windward and back in a breeze the force of which averaged about eight knots. Its greatest power being twelve knots near the finish line. The Columbia won by 17 seconds corrected time, the Constitution beating her rival, boat for boat, over the course on elapsed time by 34 seconds. This does not include the haul out of 21 seconds or more with which Constitution started. Had she not been handicapped she would have won. In the windward work she gained on the Columbia 32 seconds and also 22 seconds on the run home before the wind.

Constitution's Topmast Splice.
In a heavy puff when close to the finish line her balloon jib topsail split in two and carried a big tangle aloft. The Columbia was compelled to haul down her balloon at the same time, for the spall carried away the cringle at the head of the sail and stranded the hal-yards. But the big sail on the Constitution refused to be controlled and fluttered in segments at ft. All hands had to do their best to muzzle it. On the other hand, Columbia hauled down her balloon jib topsail in seamantlike style and, smartly bending on the spinnaker hal-yards, hoisted a reaching jib topsail in steps and, breaking it out quickly, darted across the line a winner.

In making its spinnaker about twenty minutes before the finish line was reached by the leader the Constitution's sail got tangled in the headstays, and it took several minutes to get it on track. While flapping aloft the balloon jib topsail had no opportunity to exert its utmost driving power. All the time the Columbia's balloon was doing most effective work. To smart landing and excellent judgment Columbia's victory was due. There is no need to say that the old national and the direct heirs of the Constitution, which she carried yesterday, had much to do with the happy ending she made.

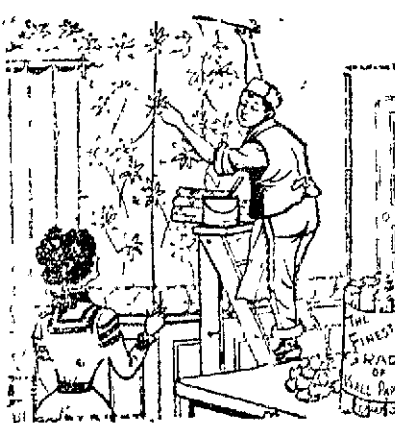

The handicap at the start seemed to be due to a lack of carelessness about the Constitution and also to the more able sea knowledge of those in charge of the Columbia. The Constitution allowed herself to be forced on the wrong side of the line, was compelled to gybe round

The public schools open next Monday.

Who repairs your shoes? John Mott, 31 Congress St.

The weather kickers have nothing to say these days.

The potato crop is coming in much better than was expected a month ago. Portsmouth day at Hampton Beach was a great success in every way. Good crowd, good weather and a good time.

"Now good digestion waits on appetite, and health on both."

The annual outing of the agents of the Portsmouth Brewing company was held on Thursday, and was a grand success.

Diphtheria, sore throat, croup. Instant relief, permanent cure. Dr. Thomas' Electric Oil. At any drug store.

A busy winter season is expected at the plant of the Frank Jones Bottling company, commencing in October.

Terrible plagues, those itching, peeling diseases of the skin. Put an end to misery. Doan's Ointment cures. At any drug store.

The Odd Ladies will have a meeting of special importance, in their hall, on Saturday afternoon at three o'clock. Per order of the Noble lady.

No need to fear sudden attacks of cholera infantum, dysentery, diarrhoea, summer complaint of any sort if you have Dr. Fowler's Extract of Wild Strawberry in the medicine chest.

The Rev. Irving C. Tomlinson, the eminent Christian Scientist, was among the visitors at this office today, he having come from Concord on Thursday evening to attend the lecture of Judge Ewing in Philbrick Hall.

ON CHRISTIAN SCIENCE.

The Lecture of Judge William G. Ewing of Chicago in Philbrick Hall Well Attended.

Quite a large number of auditors attended the lecture by Judge William G. Ewing of Chicago, in Philbrick hall on Thursday evening, on Christian Science. All were greatly pleased with the speaker. The admission was free. Among those present was Irving C. Tomlinson, of the Christian Science church in Concord, and a valuable assistant to Mrs. Mary Baker Eddy.

The most prominent paragraphs of the speech of Judge Ewing were in the following words:

"The most potent objection urged by the older churches against their own conception of Christian Science is that it is sheer impiety for any man or woman to assert that he or she is clothed with the power of God to heal the sick. The striking weakness of this objection is that Christian Scientists do not profess, in any degree, any such power. Christian Scientists simply assert, as it was declared in the time of Jesus, that the power that heals the sick is the power of God. Now if it is true that the health giving power is of God, and it is also true that God's power and love are as great now as they were in the morning of the Christian era, then, tell me, is there anything strange in the fact that the lame do walk and the blind do see, today, as they did walk and see nineteen hundred years ago? On the contrary, would it not strike your human sense of justice as passing strange, with God's power and love for men unchanged, that He should not manifest that power and love to His children, as He really did in the time of Jesus. But, really, about the only difference between our thought respecting the power and willingness of God to heal the sick, so far as I can discern it, is about this: You say you believe it, and do not trust it; we believe it, and do trust it; you say you believe with Paul that in God you live and move and have your being—and go to the doctor or the drug store for your life and health; we believe with Paul that in God we have life, health and immortality, and go to God, and God only, for life and health."

JACK AND THE SIRENS.

A blue-jacket from one of the ships at the navy yard came ashore on Wednesday evening, the 4th inst., with nine dollars tucked safely away in his blouse and a permit to be away for twenty-four hours. During the evening he made the acquaintance of a fair siren, who undertook to show him the sights about town. Incidentally she introduced him to two other sirens and Jack was in clover. The next morning things were different. The roll was not to be found and Jack promptly notified the police. The three sirens were taken to police headquarters and questioned, but it looks as if Jack's money was gone, never to return.

PROBATE COURT.

Large Amount of Business That Had Accumulated Was Transacted Last Week.

Much business was transacted in probate court the past week, owing to the fact that nothing was accomplished during August, when Judge Leavitt was on his vacation. Transactions were as follows:

Wills proved—Elizabeth H. Larned, Brentwood, Elizabeth S. Wilkins, executrix; Elizabeth Wyckoff, Derry, John E. Bancroft and Joseph A. Wyckoff, executors; Mary D. Carr, Derry, Julia N. Robinson, executrix; Allen Greenough, Portsmouth, Ann M. Greenough, Frank H. Greenough, executors; Eldora A. Pickering, Newington, J. Edward Pickering, Amanda Pickering, Alma A. Henderson, executors; Henry T. Varrell, Rye, Mary J. Varrell, executrix; James Cochran, Windham, James A. Cochran, executor; Emily M. Pierce, Boston, foreign will, no executor; Asa P. Moulton, Hampton, William H. C. Follansby, executor; Mary D. Treadwell, Exeter, Benjamin F. Treadwell, executor; Sarah J. Hanscom, Portsmouth, Charles D. Hanscom, Albert H. Hanscom, executors.

Administration granted in estates of Louisa Tuck, Brentwood, Joseph R. Webster, administrator; Joanna Leary, Portsmouth, Charles H. Batchelder, administrator; William C. Cotton, Portsmouth, William W. Cotton, administrator; Nancy J. Hobbs, North Hampton, Francis R. Drake, administrator with will annexed; Sarah E. Nudd, Hampton, Francis R. Drake, administrator; George S. Prescott, Epping, Edwin A. Prescott, administrator; Caroline A. Johnson, Portsmouth, Charles O. Johnson, administrator; Stephen F. Nichols, Kingston, Perrie W. Nichols, administrator; Martha E. Forbes, Portsmouth, John B. Forbes, administrator; Edwin R. Stevens, Candia, Hattie R. Stevens, administratrix; W. Frances Berry, Portsmouth, John S. Rand, administrator; Macy Munkiewicz, also known as Charles Marcey, Portsmouth, William J. Shuttlesworth, administrator; John P. Wilson, Londonderry, Clarence N. Garvin, administrator; Susan J. Cutts, Exeter, William H. C. Follansby, administrator.

Commissioner's notice filed in estate of Nathan Pilsifer of Deerfield, Lewis E. Kimball of Northwood and Tabitha B. Tilton of Exeter.

Commissioner's report accepted in estate of John G. Ordway of Epping.

Appointment of agent in estate of Elizabeth H. Larned of Brentwood, Parley Gardner of Exeter agent; James Cochran of Windham, William D. Cochran agent; Mary D. Carr of Derry, Greenbay K. Bartlett agent.

TIED MOTHERS.

It's hard work to take care of children and to cook, sweep, wash, sew and mend besides.

It makes a shop of the home—a shop, too, where sixteen hours make a day and yet there is much working overtime.

Hood's Sarsaparilla helps tired mothers in many ways—it refreshes the blood, improves the appetite, and assures restful sleep.

DURHAM AGRICULTURAL COLLEGE OPENED.

The New Hampshire college of agriculture and the mechanic arts opened on Thursday with an unusually large freshman class. About 40 first year students have registered and more are expected during the week. Nearly all the members of the three upper classes were present at the opening address by President Murkland.

PORTSMOUTH DAY A Great Occasion At The Beach.

There have been many great crowds at Hampton Beach since it became a popular resort, but all previous records in this respect were eclipsed on Thursday, which was Portsmouth day there. It seemed as if fully three fourths of Portsmouth's entire population had shut up house and shop, to take in the outing. The throng was swelled by hundreds of excursionists from Concord, Manchester, Somersworth, Dover and other cities, who were favored with special rates of transportation over the Boston and Maine, for the day.

At six o'clock in the evening, it was estimated, and conservatively, too, by the officials of the Exeter, Hampton and Amesbury electric railway, who had an excellent opportunity to judge, that twenty thousand people were either congregated at the beach or on the way thither.

The Portsmouth bound cars averaged more than 150 fares, from seven o'clock until midnight. Men and women alike clung to the running boards or stood between the seats, and the conductors had a hard time of it.

In the afternoon there was a base ball game between two Portsmouth teams, styled the Independents and the Firemen. The Independents had Frank Newick in the box and Tilley catching, and they won so handsily that the game was not very interesting. Parsons and Goodrich started in as the battery for the Firemen, but Parsons was batted so freely in the first four or five innings that he retired to second base. Newick had burning speed and very fine control. He struck out such a reliable hitter as Will Woods. Dennis Lynch covered short field cleverly for the Firemen. The score was twenty-four to thirteen.

Through the efforts of County Solicitor Kelley, who is a true base ball enthusiast, quite a liberal contribution had been secured from the business and professional men of this city, which went to the winning team.

After the game the two nines were treated to a first class supper of courses in the Casino dining hall, through the hospitality of President Lovell of the Exeter, Hampton and Amesbury road. Manager Harry Fuller saw that the best culinary department afforded was set before the party.

There was plenty of music at the beach during the afternoon, a half dozen good bands being in attendance to compete in the annual tournament. Early in the evening 166 of the bandmen consoled and gave a splendid hour's concert. The director was Prof. Henri G. Blaisdell of Concord.

Among the organizations present were the Naval band, Nevins' Second Regiment band of Concord, Hanson's American band of Rochester, Lafayette band of Somersworth, Newburyport Cadet band, Haverhill City band and the American Watch Co. band of Waltham, Mass.

A dance wound up the holiday. It was the greatest date of the season at Hampton, and another Portsmouth day is assured for next season.

NEW DRY DOCK.

All Stone Will Be In Place Within Seven Months.

Superintendent of Dry Dock Lee Treadwell is more than pleased with the progress of work on the mammoth new dock. He remarked on Thursday that he would have all the stone laid in less than seven months. The fact that the laying of the stone will mean the completion of the work outside of installing the pumps and gate, it would appear that the dock should be ready for use before next July. When completed it will be the finest dock in the world. Admiral Dewey upon viewing the work remarked, "There is the first and only real dock in the country."

HARBOR FRONT NEWS.

Sailed, Sept. 6—Schooner Annie F. Conlon, coal port.

In lower harbor, Sept. 6—Steam yacht Genesee.

Arrived, Sept. 6—Tug Carbonero, Philadelphia for Boston, leaving barge Monitor, with coal; tug Wyalusing, Perth Amboy for Saco, leaving barge Bristol, with coal; schooner Hattie Lewis, Boston for Eliot, light; tug Edward Luckenbach, Boston for Newport News; tug Wrestler, Perth Amboy for Boston, leaving barge Drifton, with coal; schooner Clara B. Kennard, Boston for Eliot, light; tug Tacony, Philadelphia, leaving barge Durby, with coal; tug Piccataqua, Boston, towing barge P. N. Co. No. 9, light, for Saco; barge P. N. Co. No. 10, for York; barge New Castle, for Eliot.

HORSE STOLEN.

A valuable horse and buggy owned by Hon. H. A. Yeaton was stolen from the front of the store on Market street between 2 and 6 p. m. on Thursday and the thief has been traced as far as Rochester.

SIXTEENTH ANNIVERSARY OF THE PORTSMOUTH ATHLETIC CLUB TO FITTINGLY OBSERVE THE DAY.

The celebration of the sixteenth anniversary of the Portsmouth Athletic club will occur Tuesday, September 10, 1901. The entertainment for the occasion will consist of a clambake, ball game, various athletic sports and a band concert at the "Johnson farm" at Sagamore creek in the afternoon, and a collation and orchestral concert at the club house in the evening.

The committee of arrangements have arranged an excellent programme for the day and it goes without saying that it will be a jolly good time.

Members are requested to meet at the club house at 12:15 P. M., to participate in a short march previous to the departure on the 12:35 cars. Masses will be furnished by Reinwald's Naval band.

The bake at the Johnson farm will be opened at two o'clock and after satisfying the inner man the first thing on the programme will be the ball game between the married and single men of the club.

Capt. Ben Burke has charge of the beneficiaries, while Johnny Mulloy is taking care of the colts. Both sides are confident of winning and there is much good natured rivalry between the two teams. Their make up has not as yet been published.

The athletic sports will consist of the following events: running broad jump, throwing a base ball, swimming race, three-legged race.

In the evening there will be a concert by the Naval orchestra in the reception room from eight to 10:30 P. M., and there will be vocal and instrumental music and collation in the gymnasium commencing at eight.

AT THE NAVY YARD.

William Dow, clerk in the construction office, is on the sick list.

The stone cutters on the new dry dock now finish their work at 4:30 P. M.

Naval Constructor J. G. Tawressey, U. S. N., and wife are in Philadelphia.

M. J. Leary, messenger in the steam engineering, is enjoying a short vacation.

Paymaster General Kenny, U. S. N., has been spending a few days in Portland.

Charles H. Besselièvre of yards and docks department is on a ten days' leave of absence.

Civil Engineer L. E. Gregory, U. S. N., and wife have returned from a trip down east.

Many of the workmen were off duty on Thursday attending Portsmouth day at Hampton.

Foreman Fred Hayes took several pictures of the dry dock and the surroundings on Thursday.

There was a lively rub with two of the large boat crews coming from the yard on Thursday night.

O'Connor Brothers will have the new foundry building ready to deliver to the government the present month.

Chief Electrician Flanagan and force of men are making some changes in the wiring of the U. S. S. Yankton.

Several of the large and small steam pumps taken out of the Raleigh when she was stripped have been put back in their place after extensive repairing.

Clerk John W. Leavitt of the general store is to move his family to this city from Dover and will occupy the Howard Dodge house on Maplewood avenue.

All the old different metals taken from the Spanish warships and Raleigh have been stored back of the steam engineering foundry and are now being melted into small pigs and used when needed. The Spanish boat contained a great lot of this metal said to be the finest seen on a warship at this yard for years.

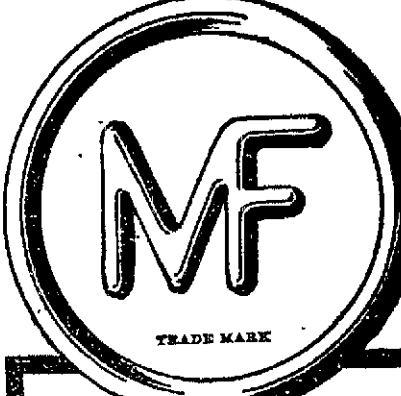

Educate Your Bowels With Cascarets. Candy Cathartic, cure constipation forever. 10c, 25c. If C. C. C. fail, druggists refund money.

UNWELCOME CUSTOMERS.

A well known north end tinsmith had a couple of customers the other evening whom he did not treat with his usual courtesy. It seems that he was about to close up when in walked a couple of gentlemen of color. With out any preliminaries the larger of the two plumped into the chair and called for a shave. The barber politely informed him his unwelcome customer that he drew the color line and requested that the two leave his shop. This the colored gentlemen refused to do, and one of them drew an ugly looking razor and repeated his demands for a shave. Things looked dark for Johnny, but he finally got the men into the street and locked his doors.

AS AID TO COMMANDANT.

Lieutenant T. T. Claven, U. S. N., has been ordered to this navy yard as aid to Rear Admiral J. J. Read, commandant of this station. It is expected that he will report here some time this week.

This mark means the best tin roof.

It is the trade mark stamped on every sheet of the best roofing tin. MF tin has been more than fifty years the English standard for best roofing—is the American standard—the world's standard now. MF roofing tin resists every unfavorable weather condition.

MF Roofing TIN

makes the best, the driest roof; lasts longer than any other form of roofing; costs no more than a roof that burns, or melts, or freezes, or breaks. Ask your roofer, or write W. C. CRONMEYER, Agent, to Carnegie Building, Pittsburgh, for illustrated book on roofing. AMERICAN TIN PLATE COMPANY, New York.

PERSONALS.

F. E. Hasty is spending a week in Massachusetts.

Mrs. John F. Mardon and daughter, Ella, of this city, are visiting in Portland.

Kenneth Beal, the newly appointed teacher at the High school, has arrived in this city.

Miss Nina Hopkinson of Saco, Me., is the guest of Mrs. Harry McKenne, Marcy street.

Baggage-master John Falvey is away from his duties, owing to some sickness in his family.

Miss Grace Ireland of Manchester is the guest of her brother, W. W. Ireland, in this city.

Clarence Paul, chief mechanic for the Frank Jones Brewing company, is enjoying a week's vacation.

Mrs. William Hackney has returned home from Manchester, where she has been the guest of friends.

Carl Finck, foreman at the Portsmouth Brewing Co., and wife, are passing a few weeks at Wolfeboro.

L. L. Drew, chief electrician of the Frank Jones Electric company, is passing a week with his family in Vermont.

Miss Ruth Dunneau of Manchester, who has been visiting her grandfather, Edwin Duncan, in this city, has returned home.

Mrs. H. Wallace Nickerson of Miller avenue is passing a week or more at the family summer home at Old Orchard beach.

The Misses Helen Giles and Minnie Hutchins of the George B. French company have gone to New York to buy goods.

George D. Harris of the Manchester baggage department has been transferred to Portsmouth, as assistant baggage-master.

Mr. and Mrs. James R. Connell are shortly to go to North Woodstock and open up their cottage there through September and October.

Mrs. Hannah Hayes of Brockton, Mass., formerly of this city, is the guest of Mr. and Mrs. John Mooney, at their home on Prospect street.

J. Albert Walker and family left the Wentworth on Thursday for Boston. In a few days they will leave for the Pan-American for a several weeks' stay.

Mr. Manson and daughter, Mrs. Elizabeth Brown, High street, who have been passing several weeks at North Conway and other summer resorts, have returned home.

Miss Eloise, daughter of Mr. and Mrs. James Borthwick, Wibird street, entertained her young friends at a lawn party on Thursday afternoon, from three to six o'clock.

Mr. and Mrs. Merrill Spalding and child of Chicago, who have been passing the summer at Ogunquit, Me., are the guests of the former's sister, Miss Susan Spalding, State street.

Charles H. Hutchins of State street, who has been passing three weeks at Monhegan island, Me., has returned home. Mrs. Hutchins, who accompanied him, is passing a few days in Boston, and with her grand-daughter, Miss Beatrice Hill, will return to this city today.

For Over Fifty Years

Mrs. Wines' Brooming Syrup has been used for children's clothing. It softens the gums, always all pain, cures wind colic and is the best remedy for diarrhoea. Twenty-five cents a bottle.
